

BLOCK-4

Analysing measurement data

Analysing measurement data

- Information text: Interpreting time series (trends, diurnal variations, outliers, sensor errors)
- Quick guide: Exporting CSV files and opening them in Excel
- Data exercise with guiding questions on the example dataset
- Annotated sample solution

***Related file:** Messdaten_Beispiel_Donau.csv – a realistic example dataset (one week, two stations, hourly readings). It is provided to participants alongside this document.*
